Tecnologies

Java, Spring Boot, Spring Cloud, JAX-RS, JavaScript, React, Angular, TypeScript, Node.js, Python

Cloud & Database

AWS, Terraform, CDK/CloudFormation, Walmart Cloud Native Platform, Oracle, Postgres, MongoDB

APIs & Tools

RESTful, Kafka, Kubernetes, Docker, JPA, JUnit, Mockito, GraphQL, Redux, TanStack Query, Bootstrap, Tailwind CSS, ELK/Grafana, Splunk, Service Now, Jenkins, Maven, Gradle, Git

Architectures & Methodologies

Microservices, Hexagonal Architecture, Event-Driven Architecture, Domain-Driven Design, Clean Code, Test-Driven Development, Test Pyramid, Agile, Scrum, DevOps

Languages

English – Fluent

Spanish – Native/Bilingual

Full-Stack Developer with 12 years of experience designing, building, and scaling robust applications. Specialized in **Java, Spring Boot, and microservices**, focused on delivering testable, maintainable software through clean code, solid testing, and modern DevOps practices.

Proficient in **Spring Boot, Kafka, Event-Driven Architecture, and React/Angular**.

Experience

Full-Stack Developer, Tata Consulting Services
Present | Guadalajara, Mexico

Full-Stack Developer, Capgemini (at MetLife)
Oct 2024 – Jan 2025 | Aguascalientes, Mexico

- Maintained and enhanced an Insurance application built with Angular and Java microservices, refactoring 30% of the codebase to align with Spring Boot best practices for better scalability and maintainability.
- Implemented JUnit testing across services, raising code coverage from 0% to 20% and strengthening overall quality and reliability.

Software Engineer, IBM (at D&B)

Dec 2023 – Mar 2024 | Aguascalientes, Mexico

- Supported a Financial Analytics application, ensuring its stability and performance.
- Resolved incidents and tasks efficiently using ServiceNow, addressing user-reported issues and implementing timely solutions to minimize downtime.

Full-Stack Developer, IBM (at Discovery)

Jan 2023 – Nov 2023 | Aguascalientes, Mexico

- Developed and enhanced microservices for a banking application, integrating customer data via SSN and extending case and product management capabilities to improve functionality and user satisfaction.
- Implemented initial automated tests across existing microservices, increasing reliability and maintainability.

Full-Stack Developer, Softtek (at Walmart)

Sep 2020 – Dec 2022 | Aguascalientes, Mexico

- Maintained, supported, and developed new features for 15 microservices built with Spring Boot and Node.js, ensuring high performance and scalability.

Education

Computer Systems

Engineering, Instituto
Tecnológico de Acapulco
2003 – 2008
Acapulco, Mexico

Certifications

Scrum Fundamentals
Certified

Java EE 6 Web Component
Developer Certified Expert

Oracle Certified
Professional, Java SE 6
Programmer

- Automated daily support tasks by creating bash and Python scripts, improving efficiency and reducing manual effort.
- Migrated services to Walmart's Cloud Native platform and Apache Kafka, enhancing scalability, resilience, and deployment efficiency while reducing costs.
- Improved system reliability and security by implementing fault-tolerant mechanisms and modernizing Spring Boot, Docker, and project dependencies.

Site Reliability Engineer,

Softtek (at Southwest Airline)

Aug 2017 – Sep 2020 | Aguascalientes, Mexico

- Automated repetitive processes in an Airline Company to streamline operations, reducing manual effort and improving efficiency for the operations team.
- Automated monitoring and incident management through Python/Bash scripting and REST APIs integrated with ServiceNow, improving reporting and reducing response times.

Java Web Developer, Softtek (at General Electric)

May 2015 – Aug 2017 | Aguascalientes, Mexico

- Supported and maintained an Invoicing application capable of retrieving transactions from plain text files via FTP interfaces, ensuring seamless data integration and processing.
- Optimized Oracle database performance by tuning SQL/PLSQL code and automating bulk data loading with SQL Loader, significantly improving processing speed and efficiency.

Java Web Developer, INEGI

Mar 2010 – May 2015 | Aguascalientes, Mexico

- Maintained and supported the SIMBAD database system, which housed census data for Mexico, ensuring accuracy and optimal performance.
